

Global IFS Partners with AtmosAir Solutions

It is with great excitement that we announce a new partnership between Global IFS and AtmosAir Solutions focused on pairing the proven benefits of Underfloor Air Distribution with the significant enhancement of bi-polar ionization technology. This combination of the ventilation effectiveness rates of UFAD and the air purification properties of bi-polar ionization provides a best-in-class solution for any building environment.

Global IFS is the leading provider of fully integrated, premium raised access flooring solutions - for high-performing, state-of-the-art environments in every building. AtmosAir Solutions is the industry leader in continuous indoor environmental disinfection technology and has tested and proven 99.9% effective in neutralizing coronavirus. Currently over 80 million square feet of AtmosAir technology is installed around the world.

The coming together of these two industry leaders presents a unique opportunity to provide the very best building solutions in these very challenging times.
